Summary

Strategic planning is a common best practice for all organizations. Identifying broad goals, defining success for the organization and helping to set a direction for the team that works daily to deliver is a logical management practice. In city governments, this takes on a particularly important role where the function of the elected leaders is to set targets and priorities for the agency staff, and then to unleash the city staff to work on accomplishing the goals and delivering for the community. An effective strategic planning process both informs city staff about the priorities of the city council they serve and helps council members resolve their competing priorities and visions for the city they serve.

City managers find the strategic planning process to be particularly helpful as it gives them a chance to hear from all the council members in a public forum where they can engage each other in healthy dialogue of shared missions and visions. This process also aids the city staff leadership team, allowing them to share their expertise to help inform the elected leaders about areas of concern, potential focus areas, and strategic solutions. The robust exchange can align the city staff to the aspirations of the city council and provide a three-to-five-year vision for their work and budget priorities.

The City of Hercules engaged Tripepi Smith Talent Solutions (TSTS) to lead a strategic planning process for the City Council in April 2024. The process included an interview with the City Manager, individual interviews with four of five council members, a facilitated City Council workshop, a debrief of the workshop with city staff and the assembly of this report.

The purpose of the process is not only to identify goals, but also to establish a work plan with reportable objectives to accomplish those goals and provide ongoing progress reports to the City Council.

Key Concepts for Strategic Planning

To create a uniform understanding of key terms used in strategic planning, the following explanations are offered:

Vision	What is Hercules' overarching aspiration for the City and community? Think 30+ years out.
Mission	What is Hercules currently focusing on to achieve the vision?
Values	What core principles guide Hercules in pursuit of its vision and mission?
Strategic Goals	What definable elements are necessary to deliver or show progress on the mission in the two-year goal cycle?

Review of Vision, Mission and Values

Given time constraints, TSTS advised the City Council to give a cursory review of the vision, mission and values to ensure there were no egregious issues. A deeper review of the vision, mission and values requires a more extensive and detailed process that can be undertaken at a later date. During the workshop, the City Council offered modest suggestions for future adjustments to vision, mission and values, but no edits were formally approved. The Council agreed to revisit the vision, mission and values at a later date.

City of Hercules' Vision

The City of Hercules is a richly diverse community, serving as a major transportation hub and a prime destination for the Bay Area. It is built on a sound economic and physical infrastructure, and its residents enjoy public safety, security, well-maintained parks, streets and public facilities. We conduct our work in an atmosphere of trust and respect. We constantly look for better ways to deliver services and always strive for excellence.

City of Hercules' Mission

Our mission is to lead our diverse community and enhance the quality of life in the City of Hercules, now and in the future. We do this by providing effective, efficient, responsive, and innovative services with integrity and a culture of transparency.

City of Hercules' Values

- Integrity – Honesty, transparency, fair dealing
- Professionalism – Exemplary conduct, competence, continuous improvement, respect
- Service – Customer orientation, courtesy, hard work, striving for excellence
- Collaboration – Teamwork, communication, community interaction and outreach
- Creativity – Thinking, innovating, encouraging critical analysis
- Tenacity – Setting priorities, staying focused, not getting discouraged
- Responsibility – Taking ownership of one's work, accountability, going the extra mile

Strategic Goals

Each City Council member was offered the opportunity to fill out a questionnaire and participate in a one-on-one interview with TSTS to provide initial insight and feedback on individual concerns and priorities. After meeting with four of five council members, TSTS reviewed the feedback, identified and consolidated concerns and priorities and presented six goals at a special meeting held on April 13, 2024¹. The council members engaged in robust discussion, agreed with the six goals in concept, identified one new goal and offered language adjustments and/or additional objectives within each goal. While the meeting was publicly noticed and open to the public, no members of the public were present at the strategic planning workshop. TSTS relied on the discussion to assemble this report, and it is anticipated that the City Council, when adopting the report, will also be adopting the objectives and tactical steps noted within those goals.

Following the facilitated meeting, city staff met to discuss and develop a work plan with department-level objectives and tactical steps that will provide a measurable way to track and report progress on the strategic goals. This report outlines the seven goals identified by City Council, along with tactical steps and metrics for each.

**Please note: The goals are not listed in any particular order.*
